

THOMAS A. DOYLE, ASSOCIATE

EXPERIENCE

Ford Motor Company, 1979 – 2002

- Quality Engineer; Lorain, Ohio Assembly Plant, 1987 – 2002. Responsible for analyzing quality issues to determine if alleged problems were the result of the design, the assembly, and/or customer misuse. Interfaced with all facets of the product cycle from design to development to manufacturing to customer satisfaction.
- Vehicle Development Engineer, 1983 – 1987. Responsible for the interior sound package on the 1986 Taurus/Sable.
- Test Operations Engineer, 1979 – 1983. Responsible for testing chassis mechanical components.

United States Air Force, Research and Development Officer, 1969 – 1979.

- Directed weapons system contractor to ensure that structural analysis and testing requirements were satisfied. Part of the initial team of engineers assigned to the contractor's facility to oversee the manufacturing of the USAF A-10.
